16.15 – 16.30	End of conference

Bonnie Sørensen, DK

Hairdresser for 30 years. Employed in conventional salons until 2005, where I opened haarfein-økologisk frisør (organic salon) in Jægergårdsgade in Aarhus. Haarfein-økologisk frisør has been certified Green Salon since it was possible in Aarhus in 2008. From the beginning I followed the rules of Green Salon. Today I have 4 employees of which 2 are students.

Ulrik Fischer Friis, DK

I am educated from DTU in 2008, in biotechnology. I started working at the National Allergy Research Centre in 2010 and in 2014 I defended my PhD in occupational contact dermatitis. In 2014 I was employed in the Research Center for Hairdresser and Beauticians, where I work with counseling of hairdresser and beauticians, upgrading the educational materials, teaching students and hairdressing teachers at hairdressing schools and updating our website.

Ans Rossy, BE

I have a Msc of Social Sciences (University of Groningen, NL) and a post-graduate diploma in Cross-Sector Partnerships for Sustainable Development (Cambridge University-Programme for Industry, UK). Professional training in ISO 26000, The Natural Step, and in Nature & Environmental Interpretation.

I have longstanding experience in Sustainable Development, CSR and ecological multi-actor change processes. Since 2013, I am Project manager at *Ecolife* in Belgium - an ngo specialised in different forms of footprinting and ecological behavioural change.

Previously, I have worked as senior consultant in CSR, as SD-expert for the *Interdepartmental Commission on Sustainable Development (CIDD)* of the federal Belgian government and for the Brussels Regional Government. I developed, in a large participatory process with stakeholders, the *Belgian CSR Framework*. I was also the Editor-in-chief of the Belgian CSR e-magazine, *Alter Business News*.

Johan Galster, DK

B. Chem. Eng., Founder of Green Salon Scandinavia.

Peter Tegel, NL

I am educated environmental engineer. These days I work on new business models for SME's in the creative industry, making this rather complex topic as practical as possible and lead to a change in business attitude. One of the business aspects I am currently working on is the 'translation' of the new High Level Structure of ISO, into a tailor made system description for SME's in the creative industry.
